PROFESSIONAL SUMMARY

Final-year Software Engineering student at AUCA with hands-on experience building and deploying production web platforms in Rwanda. Skilled across the full stack — from Django and Spring Boot backends to React frontends — with practical expertise in microservices architecture, cloud deployments, PostgreSQL, and Docker. Passionate about scalable technologies that create real impact for African communities.

EDUCATION

Bachelor of Science in Software Engineering — Expected Graduation: 2026

Adventist University of Central Africa (AUCA), Kigali, Rwanda

Certificate in Mathematics, Physics and Computer Science — 2022

Collège Adventiste de Gitwe

PROJECTS

MYESolution — Training Management Platform | Solo Developer | myesolution.org

End-to-end digital training management platform for Rwanda's MYE Solution organization — built solo from architecture through production deployment.

- Architected the system using a microservices approach with Java Spring Boot 3 backend, React 19 frontend, and PostgreSQL — fully containerized with Docker.
- Integrated Cloudflare R2 for scalable file and certificate storage, and implemented JWT-based authentication with role-based access control.
- Developed a rich lesson editor (TunyML), digital certificate issuance, and LinkedIn certificate sharing ("Add to Profile" and "Share as Post" features).
- Handled full DevOps lifecycle: Dockerized services, environment configuration, and cloud deployment to production.

Hameau des Jeunes — Youth Organization Web Platform | Team Project | hameaudesjeunes.org

Collaborative web platform for a youth-focused organization, developed during SOLVIT AFRICA training program.

- Contributed as Django backend developer within a cross-functional team, designing and building RESTful APIs and server-side logic.
- Implemented data models, authentication flows, and backend business logic powering the live site.
- Collaborated using Git version control and agile workflows under real-world client and deadline constraints.

UbugeniPalace — Artisan Support Platform

Digital marketplace helping local Rwandan artisans showcase and sell their products.

- Designed user and artisan modules with complete product management workflows.
- Developed relational database schema covering inventory, users, and transaction management.

Personal Developer Portfolio | manjoseph.github.io/ManJoseph.info

Responsive online portfolio deployed on GitHub Pages, showcasing projects and technical skills.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), Java (Spring Boot 3), PHP, Swift, C, C++, HTML/CSS

Frameworks & Libraries: React 19, Django, Spring Boot, Flutter (basics)

Databases: PostgreSQL, MySQL — data modeling, indexing, query optimization

DevOps & Cloud: Docker, Cloudflare R2, GitHub Actions, Linux server administration

Architecture: Microservices, REST APIs, JWT authentication, role-based access control

Tools: Git/GitHub, VS Code, IntelliJ IDEA, Xcode, Figma (basics), Cisco NETACAD

CERTIFICATIONS

Swift Programming Certified — Apple Training Centre, 2024

Advanced NetOps — 2025

AWS Fundamentals – AWS 2026

Network Fundamentals — Cisco NETACAD, 2024

AICE: Artificial Intelligence Career Essentials – ALX Rwanda

Virtual Assistance — ALX Rwanda

Duolingo English Proficiency Test 2025

KEY STRENGTHS

- Strong analytical and problem-solving abilities with a solid foundation in mathematics and logic
- Proven ability to deliver full-stack products independently, from architecture to production deployment
- Effective team collaborator with experience in agile, cross-functional environments
- Self-driven learner — continuously acquiring new tools and frameworks to match industry needs
